Physical Address: _____

City: _____ Zip: _____

Phone: _____

Email: _____

Would you like a TF Sign in your yard? Yes No

Enclosed is a gift for Wood River Land Trust's Trout Friendly program.

Credit card Visa Mastercard Amount \$ _____

Card # _____

Signature _____

Basic Certification:

(You must check all)

Conserve Water

- Water your landscape between 10 pm and 6 am.
- Water appropriately for your soil conditions; usually this is deeply AND every other day to cultivate healthy roots.

Reduce Chemical Use

- Raise the mower blade to 3 inches every time you mow except with spring dandelions; this will decrease your water, fertilizer and pesticide needs.
- Spot spray herbicide (no broadcast applications) AND only spray when it is the most effective way to control weeds.

Native and Drought-Tolerant Plants

- Plant native or drought-tolerant plants to reduce water use.

Silver or Gold Certification:

(For Silver: choose 2 from each category)

(For Gold: Choose 3 from each category)

Conserve Water

- Establish a no-mow zone, an area where you let the grass grow tall and reduce irrigation in that area.
- Install drip irrigation for shrubs and trees.
- Install sensors or smart controllers to automatically turn off your irrigation system when it rains.
- Invest in an irrigation audit and follow the recommendations.
- Other _____

Reduce Chemical Use

- Leave clippings on the lawn.
- Use organic fertilizers such as compost, compost tea, etc.
- We do not use any herbicides. We dig and pull weeds only.
- Eliminate synthetic fertilizers, herbicides, and pesticides.
- Other _____

Native and Drought-Tolerant Plants

- Plant native shrubs and trees in backyards or along stream banks to improve backyard habitat and protect the stream. Native shrubs along stream banks will shade the river and keep water cool for fish.
- Convert your lawn (or areas) from Kentucky blue grass to drought-tolerant or native grass.
- Plant an area in native or drought-tolerant plants to reduce water use.
- Other _____
